Gardenside Nurseries

SHELBURNE, VERMONT

Native Plants, Ferns, and Bulbs. Herbaceous Perennials, Alpine and Rockery Subjects.

This is the first list to be issued by Gardenside Nurseries. We have been growing plants for many years, and having finally secured a suitable location, both as to soil and facilities, we plan the development of a Nursery devoted primarily to the lesser known, and oftentimes exceedingly rare, plants, both Native and foreign. To these we may add special features, such as shrubs for the Rockery, or Roses for extreme climates. Our growth will depend entirely on our success in supplying you with the best of material, properly packed and shipped. We are confident of our ability to satisfy the most exacting. If you will favor us with an order we are sure we can please you.

In all parts of the world, we have correspondents. Any seed, or other material that is afforded entry to the United States we can obtain for you. Native Western and Southern Plants can be obtained and sent to you from this Nursery, thus assuring good condition. No business too large, or too small.

Many plants in this list can be secured only at certain times. In case your receipt makes a note of a peculiar shipping date, please bear this in mind. You may write us about these matters if you wish, we are glad to answer queries, and to give any advice in our power.

Our prices cover packing and delivery to carrier. We do not pay delivery charges save on special offers. Parcel post charges to the extent of 10% of order should be included. Otherwise we will ship by Express.

We guarantee all stock to be true to name, and to reach you safely. When received in good condition, our responsibility ends, and in no case will we be liable for more than the value of the plants.

Remittance can best be made by Postal Money Order on Shelburne, Vt. Personal checks are acceptable. Either should be payable to Gardenside Nurseries. At present we must decline to open accounts.
